UL 20 Mins Firerated Wood Door and Electronic Lock with Contactless RFID Keycard

Today, the majority of hotel chains operate with familiar keycard technology, led by the likes of ASSA ABLOY, SALTO, SMARTKEY. Magnetic keycards dominate but RFID and NFC cards and fobs, which some believe are easier for guest to use, are also common.

We offer a complete selection of guestroom locking and access management solution for limited service properties, as well as deluxe destination resorts. Its RFID contactless technology enhances the guest experience while extending the service life of the lock.

UL 20 Mins Firerated Wood Door and Electronic Lock with Contactless RFID Keycard

RFID Contactless Door Keycard

RFID keycard is encapsulated in PVC card with composing of IC chip and induction antenna. It combines the technology of RFID card and IC card to solve the problem of passive and contactless. Material: PVC

Size: 85.5 x 54 x 0.76mm

RFID (Radio Frequency Identification) typically use one of the following frequency ranges: low frequency (of LF, around 125KHZ), high frequency (or HF, around 13.56 MHZ), ultra-high frequency(or UHF, around 868/928 MHZ). The read range of a tag ultimately depends on many factors: the frequency of RFID system operation, the power of the reader, and the interference from other RF devices.

Encoded RFID hotel keycard for most of RFID hotel locking system.

Printing: Heidelberg offset printing/Patone color printing/Screen printing
